

What To Do When You Have an Accident

1. As best you can, protect yourself, your auto and any other property from further damage.
2. You should call the police as soon as possible, if someone is injured, damage is extensive, your vehicle has been stolen, or if you need assistance.
3. Don't say you're liable, or if anyone asks you to sign a statement, don't unless it's authorized by Foglia Insurance, Inc.
4. Take the time to gather information about the accident while you are at the accident scene. This will help you later when you fill out the formal claim report that you need to file with your agent.
5. Report the claim to your Agent as soon as possible.
6. If you are a commercial driver, let your employer know about the accident right away.
